

ISO  **NOVA**[®]

AMBIENT

“The system that purifies the air”

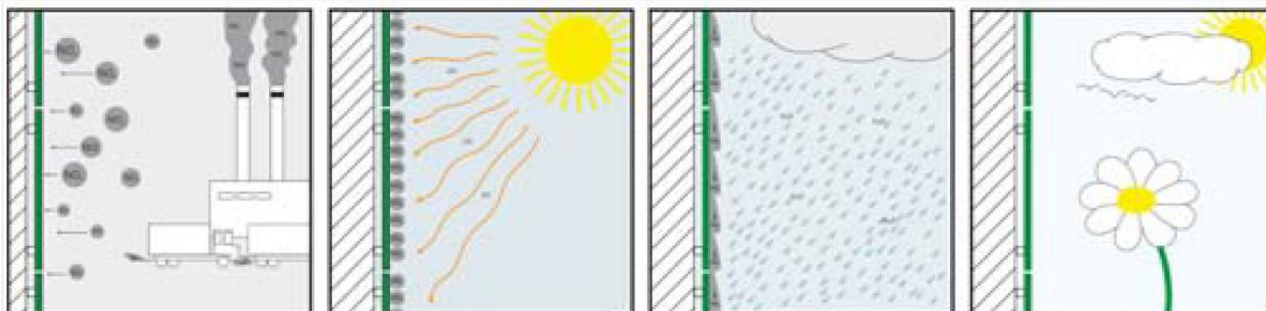

***“Turn buildings into trees
and cities into forests”***

Patented system

The combination of ISONOVA system with ceramic coating BIONICTILE shows a complete and ecological solution claddings, offering a set of high performance insulation with a porcelain capacity to improve our health, the environment and reduce pollution.

ISONOVA + BIONICTILE = AMBIENT

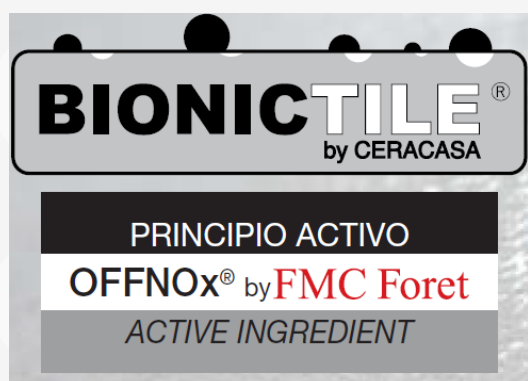

The ceramic BIONICTILE the sun's energy chemically reduce NOx.

BIONICTILE becomes toxic NOx compounds harmless nitrogen and water soluble. The surface is self-cleaning and decontamination continuous process.

200 buildings per year would decontaminate a volume equivalent to 2.638 million m³ of air. The equivalent of more than 400.000 people breathing air free of harmful nox for one year.

**A m2 removes 25.09 micrograms per hour NOX
ISO -22,197 to 12,007 (E). ITQ-CSIC-UPV**

Tested by the Institute of Chemical Technology of Valencia (UPV-ITQ)

AMBIENT

Panel that purifies the air.

*“Turn buildings into trees,
and cities into forests”*
